

LAC States capacities strengthened to improve STI policies and Open Science

Project ID 2210245021

UNESCO works for a more open science that allows free access to the knowledge generated, and greater participation of society in defining research agendas. This goes hand in hand with greater gender equity in scientific activity; diversity enriches research agendas, making public investment more efficient and fair. On the other hand, for the population to become more involved in scientific activity, it is necessary to generate absorption and understanding capacities in the population with a better education in science. It is also necessary to build two-way bridges that allow the dialogue between society and scientific activity, which is why we support science communication in order to contribute to the consolidation of a scientific culture that is the basis for sustainable development.

On-going

As of

Q4 2022

USD 61,000

Total Project Budget

USD 29,424

Total Incurred Expenditures

Country	Allocation
 Latin America and the Caribbean	100%

Financial plan

Type of Funding	Uses of Funding	Sources of Funding	Project Budget (USD)	Incurred Expenditures (USD)
Assessed Contribution - Assessed Contribution	Natural sciences	Contribution to Regular Budget	61,000	29,424

Project contributes to

Contribution to UNESCO Results Framework 2022-2025

Sector: Natural sciences

Outcome 4 - Advance international cooperation in science, technology and innovation

Output: 4.SC4 - Member States capacities strengthened to improve STI policies, access to scientific and technological advancements and enhance knowledge sharing, including through Open Science

Contribution to Sustainable Development Goals
