

Strengthening Belize's Evidence Base And Systems For Crisis Response

Project ID 263BZE2000

This joint programme (JP) seeks to fill in existing gaps in Belize's information base and tools to inform the design of appropriate and timely strategies and programs that assist populations affected by the ongoing food, energy, and financing crises and future similar shocks, and policy recommendation and identification of options for financing key interventions. This JP will specifically contribute to the information and system gaps faced by GoB in responding to shocks with the right interventions and in a more timely and effective fashion targeting the most vulnerable groups, marginalized women and poor rural households.
